Engineering resins

Tough 1500 Resin Simulates PP plastic. Great for functional prototyping of assemblies, snap-fits and hinges. Tough 1500 Resin is the most resilient material in our functional family of Tough and Durable Resins. Choose Tough 1500 Resin for stiff and pliable parts that bend and spring back quickly.

Tough 1500 Resin is ideal for:

- Prototypes that repeatedly bend and quickly return to shape
- Jigs and fixtures requiring repeated deflection
- Simulating the strength and stiffness of polypropylene (PP)
- Certified for permanent skin contact*
